

## GAZ – CA12      *CFC Free Safety Solvent and Degreaser*

### Product Description:

**GAZ – CA12** is a quick-drying, non-flammable safety solvent degreaser. Spray it on to remove grease and oil instantly from parts, tools, and machinery. It will not affect conductivity thus permitting electrical equipment to be clean while in use. **GAZ – CA12** is also effective on upholstery and fabric to remove grease grime, crayon, oil, gunk, chewing gum, printing ink, and lipstick.

### Features and Benefits:

- Evaporates quickly with no residue;
- Non-flammable, non-corrosive, non-staining, non-conductive;
- Excellent spot remover;
- Dielectric strength of 32 KV;
- Enables in-place cleaning without disassembly;
- Aerosol is CFC free.

### Applications:

All metals, electric motors, engines, power tools, brake system, automotive parts, tools, vending machines, printing equipment, generators, alternators, upholstery, fabrics, carpeting and some plastics.

## GAZ – CA13      *Contact Cleaner*

### Product Description:

**GAZ – CA13** is specifically designed to penetrate and clean, removing moisture, oil, dust, grease, oxidation, etc., and then totally evaporates, leaving a residue-free surface. A high-purity solvent for cleaning critical metallic and non-metallic surfaces.

### Features and Benefits:

- Non-flammable, non-conducting, non-staining, and non-corrosive;
- Quick cleaning action leaves no residue;
- Will not harm most plastic, plant, or wire insulation;
- May be applied while equipment is in use;
- Aerosol is CFC Free

### Applications:

Magnetic and video tape heads, motors, precision instruments, typewriters, copiers, printed circuits, computer heads, relays, micro contacts, calculators, cash registers, alarm systems, and telephone switch gears. Plant using electrical equipment, automatic controls, terminals and plug-in connectors, telephone and telex equipment.

## **GAZ – CA14      *Gasket Remover***

### **Product Description:**

**GAZ – CA14** is a thick jelled stripper that quickly dissolves gasket cement, baked-on gaskets, carbon deposits, dried oils, and greases. Strip paint, varnish, and decals in seconds. Eliminate damage often caused by excessive scrapping and other mechanical methods.

### **Features and Benefits:**

- Jelled product stays where sprayed;
- Helps eliminate surface damage;
- Non-corrosive;
- Dissolves asphalt, carbon and other hard-to-remove deposits;
- Excellent graffiti remover.

### **Applications:**

Metal, stone, glass, wood, plaster, masonry, fibreglass, concrete, tile and ceramics. Provides quick and easy removal of gaskets, paint, lacquer, enamel, varnish, shellac, acrylics, and tar. Removes carbon deposits from valves, pistons, and cylinder heads.

## **GAZ – CA15      *Battery Cleaner w/acid Indicator***

### **Product Description:**

**GAZ – CA15** is a foaming cleanser that dissolves and neutralizes battery acid corrosion. The Visual Indicator turns RED in presence of acid. When the acid is neutralized the indicator shows YELLOW. Simply spray on, wait 2 minutes, and wipe or flush corrosion away with water.

### **Features and Benefits:**

- Extends battery life;
- Insures maximum battery output;
- Removes corrosion from terminals and casing;
- Restores battery appearance;
- Visual indicator reveals presence of acid.

### **Applications:**

Use on all vehicle batteries such as forklifts, golf carts, cars, truck, buses, and taxis. Also recommended for auxiliary generators and emergency equipment, railroad and construction equipment, and for all types of batteries in or out of storage.
