

GAZ-CC01 Industrial Coil Cleaner

Product Description:

GAZ-CC01 is highly concentrated alkaline FOAMING CONDENSER CLEANER. It is designed to remove grease, dirt and other organic material from refrigeration equipment. The powerful foaming action allows **GAZ-CC01** to penetrate those hard-to-reach areas and outer surface of the new condenser with a CLEAN, BRIGHT, like NEW look

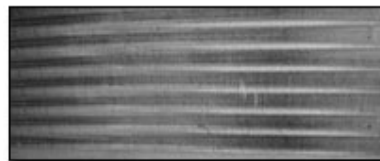

Applications / Features:

Features and Benefits:

- Increase the efficiency of heating and air conditioning units
- Biodegradable-no unpleasant odours.
- Energy savers-Washes away soil deposits which insulate the heat transfer and reduce efficiency
- Loosens insulating deposits as it clings to coils.
- Maximum heating and cooling is attained without excess energy usage.
- Protects metal frames and filters against corrosion.

Before GAZ- CC01

After GAZ- CC01

Directions:

GAZ-CC01 should be mixed with 4 quarts of water to 1 quart of cleaner. Apply a light mist to the entire condenser area, and then apply a second heavier coating. Allow this solution to soak for 5-10 minutes before rinsing. For extremely heavily soiled areas it may be necessary to repeat the above. **REMEMBER TO ALWAYS WEAR SAFETY GOOGLES AND RUBBER GLOVES** when HANDLING, MIXING or USING.
