

Product Description:

GAZ-CR01 is a synthetic, water based resin emulsion product formulated for use as a primer or topcoat for rusted steel / iron surfaces.

GAZ-CR01 reacts chemically with rust to form an iron complex while simultaneously acting as a polymer coating that prevents further rusting of the surface.

GAZ-CR01 is easy to apply and converts rust into protective black coating that can then be left either as is or treated with the appropriate topcoat.

Applications / Features:

Advantages & Benefits:

- Simple to use. Wire brush any loose or flaky rust from the surface, and then just apply **GAZ-CR01** with a brush, roller or sprayer. **GAZ-CR01** does the rest.
- Converts and primes in one simple operation. Replaces the need for conventional primers when used with most industrial finish topcoats.
- Effective even on damp rusty metal.
- Safe-practically non-toxic, non-flammable
