

## Product Description:

**GAZ-LI05** is produced from highly refined base stocks and premium grade hydraulic oil additive packages. These products are designed for today's modern hydraulic systems with higher make up rates and sophisticated filtering systems.

The additives found in **GAZ-LI05** enhance the anti-wear characteristics of the fluid. They also inhibit foam from forming in the oil and offer a robust protection against rust and corrosion as well as superior filterability as measured by the stringent Afnor NF E 48-690/691

**GAZ- LI05** is suitable for applications used in hydraulic & pump systems where excellent antiwear performance & superior filterability are essential.

## Applications / Features:

- Prevents wear.
- Protects against rust and corrosion.
- Resists foaming & separates readily from water.
- Superior filterability
