

Product Description:

GAZ-LI01 are formulated from highly refined paraffinic base stocks and specially selected additives designed to achieve premium turbine oil performance, particularly in the areas of resistance to oxidation and the formation of sludge and varnish at elevated temperatures. The additive components in **GAZ-LI01** also afford exceptional rust and corrosion protection.

Applications / Features:

- Offer outstanding thermal stability, extended service life and strong water separation properties.
- Suitable in all types of turbines system.
- Find applications in reciprocating compressors, hydraulic systems where anti-wear additives are unacceptable, gear reducer requiring superior rust and oxidation inhibited lubricants, high temperature circulating oil systems, machine tools.
- Unsurpassed water separation properties.
